

Map of the levels

When the user clicks the option new game which is one of the options available in the starting screen. Then the user will be asked to select difficulty and the difficulty options available will be easy or hard. The main difference between easy and hard difficulty is the timer that will be available to the user. The levels that you play in easy and hard difficulty will be the same. When you play the easy difficulty, you will start with a timer of 30 minutes for the first level and if you are successful in completing the first level in that 30 minutes you will be able to proceed to the next level. From Level 1 to Level 10 the timer will be 30 minutes for each then from Level 11 to Level 20 the timer will be 20 minutes for each. Then from Level 21 to Level 30 the timer will be 15 minutes for each then from Level 31 to 40 the timer will be 10 minutes for each. For the last ten levels which is from Level 41 to 50 the timer will be for 5 minutes for each.

On the other hand, for hard difficulty the timer will start at 20 minutes for the first level and if you are successful in completing the first level in that 20 minutes you will be able to proceed to the next level. From Level 1 to Level 10 the timer will be 20 minutes for each then from Level 11 to Level 20 the timer will be 10 minutes for each. Then from Level 21 to Level 30 the timer will be 10 minutes for each then from Level 31 to 40 the timer will be 5 minutes for each. For the last ten levels which is from Level 41 to 50 the timer will be for 2 in the half minutes for each.

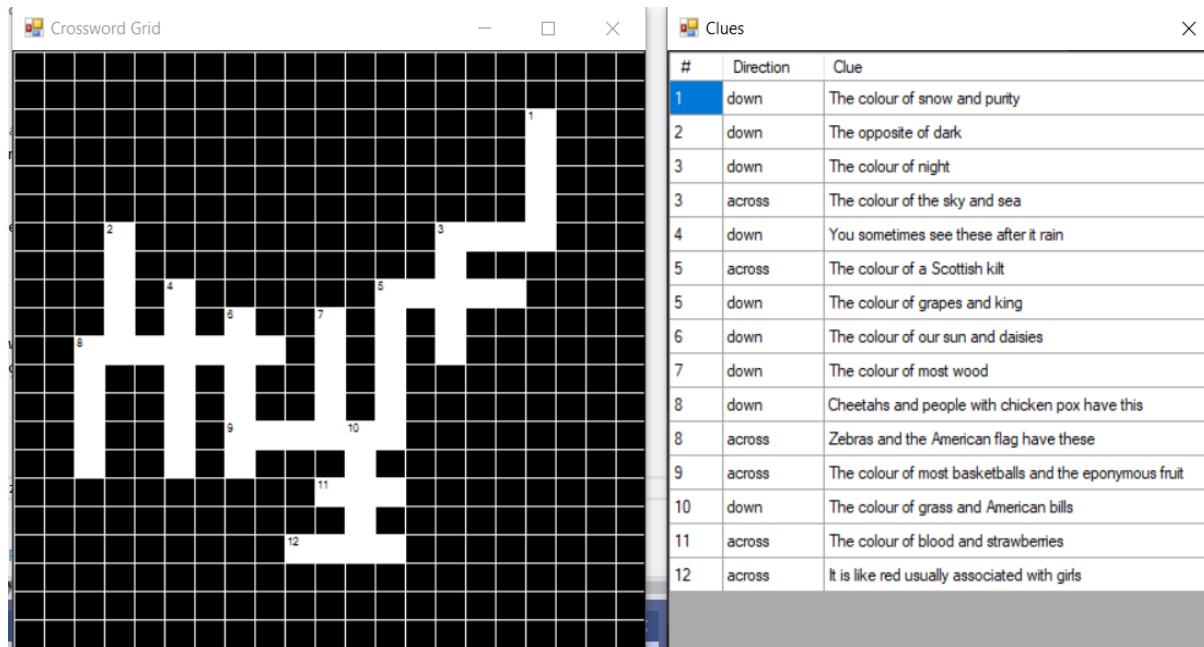

In the game there will be about 50 crossword levels and you will progress to the next level only if you are successful in completing the current level you are at within the given time.

| Level | Timer - Easy | Timer- Hard |
|--------------|---------------------|--------------------|
| 1 - 10 | 30:00 | 20:00 |
